Islam Momen

Front-End Developer

islammomen868@gmail.com | +201144891013 | www.linkedin.com/in/islam-momen

About Me

"Front-End Developer and Software Engineering enthusiast with expertise in React ecosystem and modern web architecture. Experienced in designing intuitive, cross-browser interfaces and integrating dynamic APIs while focusing on code maintainability and user-centric design. Combines front-end proficiency with a strong grasp of software testing methodologies (Automation & Manual QA) to deliver robust, bug-free web solutions from design to deployment."

EDUCATION

Al-Azhar University, Faculty of Computers and Information Sciences
Bachelor of Science in Computer Science 2025 – 2029

Skills

- React.js
- Next.js
- Tailwind CSS
- Responsive Web Design
- REST API Integration
- Git & GitHub
- UI/UX Principles

- Communication
- Team Collaboration
- Problem Solving
- Time Management
- Adaptability

PROJECTS

- Space Explorer — A React web app displaying information about planets and space, featuring a clean, responsive UI and organized data presentation.

Courses / Certifications

Route Academy | Front-End Web Development April 2026 – Novmber 2026

- Architected and Deployed Interactive Web Applications: Spearheaded the development of responsive, cross-browser web interfaces leveraging HTML5, CSS3, JavaScript (ES6+), and React.
- Component-Driven Engineering: Implemented modular component architectures and managed complex application state using modern React workflows optimize rendering performance and maintainability.
- Project Delivery: Engineered 5+ end-to-end hands-on web applications, enforcing clean code principles, RESTful API integration, and responsive desig systems.

Digital Egypt Pioneers Initiative (DEPI) — Automation Testi July 2026 – April 2027

- Test Automation Frameworks: Mastered automated testing paradigms and frameworks (e.g., Selenium WebDriver / Cypress), streamlining test execution across multi-browser environments.
- Quality Assurance Life Cycle: Designed comprehensive test suites, executed automated regression testing, and managed defect tracking workflows to en high-grade software reliability.
- End-to-End Test Implementation: Applied rigorous test case design patterns and structured bug-reporting methodologies on simulated production-level enterprise applications.
